

PROJECT 1: BUSINESS OBJECT DEFINITIONS

This document lists the business objects and their definitions in my data model. The text for them was scripted here before being ported to my Conceptual Data Model and Logical Data Model in Erwin. Although, my design process was iterative: as my model evolved, I edited this document to include more objects and definitions and revise existing ones. Thus, I have uploaded both the Word file and PDF to demonstrate this back and forth between revisions and publishing.

Business Object (Entity)	Definition
Address	Where a Person lives.
Bitcoin	A digital (crypto) currency.
Credit Card	An Electronic Payment Card billed on a bank account.
Customer	A Person who subscribes to a Streaming Service. *("subscribes..." relation in definition?)
Customer Electronic Payment (intermediate)	An Electronic Payment made by a Customer.
Customer Streaming Service Subscription (intermediate)	A Streaming Service Subscription that a Customer has.
Electronic Payment	A payment made electronically (online).
Electronic Payment Card	An Electronic Payment Type.
Electronic Payment Type	The way in which an Electronic Payment is made.
Gift Card	A prepaid Electronic Payment Card given as a gift.
Movie	A video that is streamed from a Streaming Service.
Movie Customer Streaming Service Subscription (intermediate)	A single Movie that is available from a Customer's Streaming Service Subscription.
Movie Star (intermediate)	A Star who acts in a Movie.
Person	A single human being.
Star	A famous Person who acts.
Streaming Service	A service that streams Movies over the internet.
Streaming Service Subscription	A subscription to a Streaming Service.
